

## HTML/CSS - HTML and CSS project 01

## Problem Statement:

Create a personal portfolio website that showcases your skills, projects, and professional experience. The website should serve as a digital resume, allowing potential employers or clients to understand your qualifications and capabilities at a glance.

## Technologies:

- HTML: Structure the content of the website.
- CSS: Style the website.

## Requirements:

- **Showcase Projects:** Display a selection of your best work, including descriptions, technologies used, and links to live demos or repositories.
- **Highlight Skills:** Provide a clear overview of your technical skills, including programming languages, frameworks, and tools you are proficient in.
- **Professional Experience:** Outline your work history and relevant experience concisely and visually appealingly.
- **Contact Information:** Include a way for visitors to contact you easily, such as a contact form or direct email link.

## Deliverables:

- A fully functional portfolio website hosted online on platforms like Netlify.
- Source code stored in a GitHub repository.

## Figma/UI:

- <https://www.figma.com/design/lhy6ThGMe0Rb02VV3fXanI/Html-Css-portfolio?node-id=0-1&t=PHiyjUNpYsOJYFIy-1>
- Make sure your UI looks exactly the same as the one given in the Figma link.
